BRAND GUIDELINES
VERSION 1.0 / 2026

INTRODUCTION

One brand. Every touchpoint.

A shared foundation for how VSPH looks, speaks and shows up.

Use this guide to create clear, consistent communications across digital products, proposals, presentations and everyday business materials.

Edition note

The company name, core messages, palette and Inter typeface come from the supplied VSPH reference. New strategy and implementation rules are proposed standards for adoption.

Logo artwork is reconstructed from the supplied screenshot for guideline demonstrations. Compare it with the original vector master before production.

01	Brand foundations	03—06
02	Our identity	07—12
03	Visual language	13—21
04	Voice & messaging	22—25
05	Brand in practice	26—32

Start with the principles. Use the specifications as working rules. Review each application at its final size.

01

Brand foundations

Thoughtful software starts with a clear understanding of people, business and possibility.

POSITIONING / PURPOSE / BRAND PILLARS

01 / BRAND FOUNDATIONS

Built around what comes next.

WHO WE ARE

A software partner for businesses ready to move forward.

VSPH builds scalable digital solutions that help organizations streamline work, connect experiences and prepare for growth.

Through web, mobile and enterprise applications, we turn business ideas into useful software.

OUR POSITIONING

**Enterprise software.
Practical thinking.
Human impact.**

We connect business understanding with software delivery, shaping digital experiences around the people who use them.

FOR ORGANIZATIONS BUILDING THEIR NEXT DIGITAL CHAPTER

01 / THINK

Understand the challenge

Begin with business goals, user needs and the context around the work.

02 / BUILD

Shape the solution

Turn complexity into a clear approach to useful digital products.

03 / GROW

Enable what follows

Design with adaptability, maintainability and future needs in mind.

01 / BRAND FOUNDATIONS

A clear reason to build.

PROPOSED STRATEGIC FOUNDATION

Make complex business challenges easier to solve through thoughtful software.

OUR MISSION

Turn ideas into useful digital solutions.

Work with businesses to understand their needs and build web, mobile and enterprise applications that support meaningful progress.

OUR VISION

A smarter tomorrow, made possible together.

A future where businesses can use well-designed software to serve people better, adapt confidently and explore new possibilities.

OUR PROMISE

Clear thinking. Collaborative delivery. Software built for what comes next.

01 / BRAND FOUNDATIONS

People. Products. Possibilities.

01

People

Understand the people behind every business challenge. Listen carefully. Make the work easier to use and easier to understand.

02

Products

Build useful digital experiences around real needs. Give clarity, reliability and maintainability a place in every decision.

03

Possibilities

Create foundations that can grow with the business. Stay curious about what technology can make possible next.

OUR CAPABILITIES

Web Solutions

Connected experiences for customers and teams.

Mobile Applications

Purposeful experiences wherever work happens.

Custom Software

Applications shaped around business workflows.

Collaboration & Consulting

Clear thinking to guide the next digital initiative.

02

Our identity

A distinctive mark. A consistent signature. Recognition built through careful repetition.

LOGO / VARIANTS / CLEAR SPACE / CORRECT USE

02 / OUR IDENTITY

A recognizable expression of progress.

Primary logo

The horizontal signature pairs the angular V symbol with the VSPH wordmark. Use this arrangement as the default brand identifier.

Standalone symbol

Use the V symbol in compact spaces where the VSPH name is already clear, such as an avatar or an application launcher.

Keep the mark and wordmark in their original relationship. Treat the complete lockup as one piece of artwork.

THE VISUAL IDEA

Structure meets possibility.

The V creates a clear foundation. Ascending pixels suggest digital progress and forward movement.

The logo shown throughout this guide is a reference reconstruction. Original geometry, spacing and color gradients must be verified against VSPH's master artwork before release.

02 / OUR IDENTITY

Choose the right version.

Clarity begins with the background.

Select the version that preserves the complete silhouette and keeps the VSPH name immediately readable.

Use solid, quiet backgrounds. On photographs, place the logo in a clean area or on a solid brand-color panel.

Production rule

For embroidery, engraving and one-ink print, use a verified monochrome master. Never simulate a color logo with an untested conversion.

PRIMARY / LIGHT BACKGROUND

Default for documents and white interfaces.

REVERSED / NAVY BACKGROUND

For covers and darker brand environments.

MONOCHROME / BLACK

For single-color reproduction.

MONOCHROME / NAVY

For light-blue fields and restricted production.

02 / OUR IDENTITY

Give the logo room to work.

Clear space

Let **x** equal the height of the main V body, excluding the ascending pixels. Keep at least **x** clear on every side of the complete logo's outer bounds.

Text, images, borders and page edges must stay outside this area. More breathing room is encouraged.

Minimum reproduction

Proposed starting sizes are shown below. Inspect at final output size and enlarge whenever the smallest pixel details lose definition.

HORIZONTAL SIGNATURE

140 px wide / 35 mm wide

Digital / print minimum starting point.

STANDALONE SYMBOL

40 px high / 10 mm high

Use a separately approved small-size asset below this.

02 / OUR IDENTITY

One signature. A clear hierarchy.

Different messages have different jobs.

Lead with one headline. Use the descriptor to explain the business, then add supporting copy where the audience needs more context.

Set messages as live type in the layout. Do not attach new text to the logo or invent additional logo lockups.

Preserve the exact wording and capitalization when using the brand headline or signature. Avoid placing every message together in a small composition.

01 / BRAND HEADLINE

Building What's Next.

02 / COMPANY DESCRIPTOR

Enterprise Software Solutions for a Smarter Tomorrow.

03 / SUPPORTING STATEMENT

Building scalable digital solutions.

04 / BRAND SIGNATURE

PEOPLE | PRODUCTS | POSSIBILITIES

02 / OUR IDENTITY

Protect what makes us recognizable.

**✗ Preserve proportions**

Never stretch or compress the artwork.

**✗ Keep it level**

Do not rotate the signature.

**✗ Respect the palette**

Do not introduce arbitrary logo colors.

**✗ Keep backgrounds quiet**

Avoid busy fields behind the mark.

**✗ Use the original lockup**

Do not recreate the wordmark in another font.

**✗ Keep the artwork clean**

Do not add shadows, outlines or effects.

These are incorrect-use demonstrations. Never separate, remove or reposition the ascending pixels within the logo artwork.

03

Visual language

A focused system of color, type and structure that makes complex ideas feel clear.

COLOR / TYPOGRAPHY / LAYOUT / IMAGERY

03 / VISUAL LANGUAGE

Our colors. Precise and purposeful.

Primary Navy

HEX #00255A
RGB 0 / 37 / 90

Trust, depth and enterprise confidence.

Core Blue

HEX #0069C8
RGB 0 / 105 / 200

Action, innovation and technology.

Light Blue

HEX #50C0E8
RGB 80 / 192 / 232

Progress, openness and digital energy.

White

HEX #FFFFFF
RGB 255 / 255 / 255

Space, clarity and a clean foundation.

Black

HEX #000000
RGB 0 / 0 / 0

Single-color reproduction and utility.

Grey

HEX #F1F2F2
RGB 241 / 242 / 242

Quiet surfaces and visual organization.

Digital source of truth: use these exact sRGB / HEX values. For print, convert through the printer's ICC profile and approve a physical proof. CMYK and Pantone equivalents are not specified as verified brand standards in this edition.

03 / VISUAL LANGUAGE

Color should clarify, not compete.

Start with restraint.

Use white and grey for most content, navy for hierarchy, core blue for actions, and light blue for selective accents.

60% NEUTRALS / 25% NAVY
10% CORE BLUE / 5% LIGHT BLUE

A starting balance for content layouts. Covers and section pages may use a dominant navy or blue field.

Text contrast

Target at least 4.5:1 for normal text and 3:1 for qualifying large text. Test the actual foreground and background together.

ALL FOUR PAIRINGS MEET THE NORMAL-TEXT CONTRAST THRESHOLD.

Avoid for meaningful text	Ratio	Use instead
White on light blue	2.09:1	Navy on light blue
Core blue on navy	2.73:1	White or light blue on navy

Calculated from the supplied solid sRGB colors at full opacity. Recheck gradients, overlays and interaction states. Never use color as the only way to communicate status.

Reference: [W3C · WCAG 2.2 text contrast guidance](#)

03 / VISUAL LANGUAGE

Inter. Clear by design.

One type family.

A consistent voice.

Inter is the primary VSPH typeface across brand communications, websites, interfaces and presentations.

Use Regular for body copy, Medium for labels, Semibold for supporting headings and Bold for strong emphasis.

Fallback stack

Inter, Arial, sans-serif.

Use the fallback only where Inter cannot be embedded or installed.

[Official Inter font family.](#)

Inter

Aa

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789 & @ # + / ? !

Aa

Light
300

Aa

Regular
400

Aa

Medium
500

Aa

Semibold
600

Aa

Bold
700

Reserve Light for large display text. Avoid it for small labels, body paragraphs or reverse text.

03 / VISUAL LANGUAGE

A hierarchy that does the work.

Digital type scale

The supplied scale uses generous leading and deliberate weight changes. Set one clear entry point, then guide the reader through the content.

Keep paragraphs left-aligned. Aim for 45–75 characters per line. Use sentence case for ordinary headings.

Responsive & print use

On small screens, reduce H1 to 36/44 px and keep body text at 16/24 px or larger.

For A4 documents, start with 28–36 pt headings and 10.5–12 pt body copy. Check the printed reading size.

Building next.

H1 · 60/72 · 700

Clarity at scale.

H2 · 40/52 · 600

Ideas into applications.

H3 · 28/36 · 600

Software around real needs.

H4 · 20/28 · 500

Built with people in mind.

BODY · 18/28 · 400

Clear labels. Useful context.

SUPPORT · 14/20 · 400

SPECIFICATIONS ARE SIZE / LINE HEIGHT IN CSS PIXELS, FOLLOWED BY FONT WEIGHT.

03 / VISUAL LANGUAGE

Structure creates confidence.

Use a disciplined grid.

Align headings, images and captions to shared edges. Build one strong focal point and allow generous open space around it.

For desktop layouts, use a 12-column grid. For mobile, use four columns and 20–24 px side margins.

Document starting point

Landscape A4. Approximately 15 mm outer margins. Use a 1:2 guidance-to-demonstration split where a rule needs a visual example.

8 px spacing rhythm

Build digital spacing from multiples of eight. Use 4 px only for small optical adjustments.

Use white space to separate ideas before adding boxes, dividers or decorative effects.

One alignment logic

Use a consistent left edge. Keep captions attached to the example they explain.

03 / VISUAL LANGUAGE

A visual language of forward motion.

Progress lines

A proposed supporting graphic system: fine angular paths and a small rhythm of ascending square details, inspired by the V symbol.

Use the device to frame a story, connect content or suggest momentum. Keep the logo visually distinct.

Working rules

Use a single direction of movement. Keep strokes light. Limit detail to one area. Keep text on a quiet field.

Never turn the motif into a replacement logo or scatter pixels around body copy.

Use line work as decoration. Never rely on it to carry essential information.

03 / VISUAL LANGUAGE

Simple icons. Shared construction.

One coherent family

Use clear outline icons with rounded ends and consistent optical weight. Favor familiar symbols that explain the content quickly.

Web Solutions

Mobile Applications

Custom Software

Consulting

Proposed construction

24 × 24 px base grid.

2 px stroke at the base size.

Consistent corner treatment.

Core blue on light backgrounds.

Pair unfamiliar symbols with labels. Keep decorative icons out of the accessibility reading order; label controls by function.

Do not mix filled, outlined, 3D and multicolor styles within one composition.

Security

Scalability

Innovation

Support

The icons above are original demonstration artwork created for this guide. Validate final production icons at their intended interface size.

03 / VISUAL LANGUAGE

Technology with people in the picture.

01 / HUMAN

People doing meaningful work

Choose candid collaboration, attentive interaction and believable business environments. Keep skin tones natural.

02 / PURPOSEFUL

Tools in useful contexts

Show software as part of real work. Use clean, accurate interfaces and remove sensitive information.

03 / FORWARD-LOOKING

A broader perspective

Use architecture and infrastructure to suggest ambition. Keep compositions calm and the blue grade restrained.

Avoid staged handshakes, generic glowing globes, science-fiction effects and imagery that suggests unverified client relationships. Secure usage rights and appropriate permissions for production photography.

AI-GENERATED STYLE REFERENCE / NOT DOCUMENTARY PHOTOGRAPHY OF VSPH EMPLOYEES, PRODUCTS OR OFFICES.

04

Voice & messaging

Clear thinking, expressed clearly. A voice that is confident, collaborative and always human.

VOICE PRINCIPLES / MESSAGE HIERARCHY / WRITING IN PRACTICE

04 / VOICE & MESSAGING

Confident enough to be clear.

OUR VOICE	HOW IT SOUNDS	HOW TO APPLY IT
Professional	Precise, composed and easy to follow.	Explain the work in plain language. Make the next step clear.
Innovative	Forward-looking, grounded in possibility.	Show how an idea solves a practical problem.
Trustworthy	Clear about scope, evidence and limitations.	Use specific, verified claims. State assumptions honestly.
Collaborative	Open, constructive and respectful.	Invite discussion and recognize shared ownership.
Human	Familiar language that respects the reader.	Write as one person helping another make progress.

"Technology that empowers people and transforms businesses."

04 / VOICE & MESSAGING

Say what matters, in the right order.

Lead with the audience's need.

Use the core message to establish the brand, then add the most relevant capability and business context.

Support value statements with clear explanations. Use evidence when it exists; never invent results to strengthen a story.

ELEVATOR INTRODUCTION

VSPH builds scalable web, mobile and enterprise applications. We work with businesses to turn ideas into practical digital solutions that support how they operate and grow.

CORE MESSAGE

Building What's Next.

Enterprise Software Solutions for a Smarter Tomorrow.

VALUE STATEMENT

Explain the value

Building scalable digital solutions. Helping businesses innovate, streamline and grow.

CAPABILITY MESSAGE

Make it relevant

Connect web, mobile, custom software or consulting to the reader's specific need.

CLOSE WITH A USEFUL ACTION

Discuss your project. Explore our services.

"POWERING BUSINESS TRANSFORMATION." MAY SUPPORT CAMPAIGN COPY WITHOUT REPLACING THE PRIMARY HEADLINE.

04 / VOICE & MESSAGING

Less jargon. More meaning.

CONTEXT	AVOID	PREFER
Marketing	We leverage cutting-edge solutions to revolutionize your business.	We build software that helps your teams work better.
Sales	Our platform guarantees seamless digital transformation.	We help you plan and build the next stage of your digital operations.
Project enquiry	Submit your requirements.	Tell us what you want to build.
Product interface	Invalid input.	Enter a valid email address to continue.

NAME & TERMINOLOGY

Use the name consistently

Write VSPH in capitals. Keep product or service labels clear and descriptive.

STYLE & CLARITY

Write with intention

Prefer active verbs, short sentences and sentence case. Explain unfamiliar abbreviations on first use.

EVIDENCE & ACCURACY

Make claims responsibly

Use client names, certifications and performance results only when verified and approved.

Tone can adapt to context: more concise in interfaces, more explanatory in proposals, and warmer in project communication. The underlying voice stays consistent.

05

Brand in practice

From a first impression to an everyday interaction, the same principles carry through.

DIGITAL / PRESENTATIONS / STATIONERY / PRODUCTION

05 / BRAND IN PRACTICE

A digital presence with purpose.

Website & interface

Use navy to establish the brand, a clear message to orient visitors, and core blue to identify the primary action.

Keep navigation simple. Group services around user needs. Give each section one clear next step.

Digital house rules

Use visible keyboard focus. Pair errors with helpful text. Prefer 44 × 44 px interaction targets. Provide meaningful image alternatives.

The target size is a proposed VSPH house standard. Test complete pages against WCAG 2.2 AA before release.

ILLUSTRATIVE WEBSITE CONCEPT / LAYOUT AND COPY EXAMPLE, NOT A DEPLOYED VSPH WEBSITE.

05 / BRAND IN PRACTICE

Present ideas with a clear point of view.

A repeatable presentation system

Use a navy cover, blue section dividers and white content pages. Carry the same grid and typography through the deck.

Make slide titles say something useful. Use one main idea per slide. Label diagrams directly and give charts a source.

16:9 slide starting point

32–44 pt titles.

18–24 pt body copy.

At least 5% outer margins.

Keep legal and source text readable.

Use diagrams to explain a process. Include performance charts only when real data is available.

01 / OPEN WITH THE BRAND

02 / SIGNAL A NEW CHAPTER

03 / EXPLAIN ONE CLEAR IDEA

04 / MAKE THE NEXT STEP CLEAR

05 / BRAND IN PRACTICE

Consistency in everyday communication.

Stationery & signatures

Keep business materials composed and practical. Use a small, clear logo and give the content room to breathe.

Set names and headings in navy. Use core blue for links or a single rule. Keep contact details in live text.

EMAIL SIGNATURE STRUCTURE

BUILDING WHAT'S NEXT.

05 / BRAND IN PRACTICE

One identity. Different conversations.

Social & campaign content

Lead with one useful idea. Keep the visual uncluttered and put detail in the caption. Adapt the composition to the platform's current dimensions.

Application concepts are illustrative. Replace placeholders with verified details and check each composition at its final delivery size.

Proposals & commercial documents

Make the audience and project clear. Organize the story around goals, scope, approach, deliverables, responsibilities and next steps.

05 / BRAND IN PRACTICE

Prepare once. Reproduce consistently.

Required production asset library

ASSET	PREFERRED FORMATS
Verified primary & reversed logos	SVG / PDF / PNG
Verified monochrome & symbol files	SVG / PDF / PNG
Palette & typography styles	HEX tokens / font files
Approved icons & graphic motifs	SVG
Business & digital templates	Editable source files

This is a production checklist, not a claim that original source assets were supplied. The reconstructed logo and new standards in this edition require brand-owner verification.

SUGGESTED FILE NAMING

VSPH_Logo_Primary_RGB_v1.svg
VSPH_BrandGuidelines_v1.0.pdf

Export & quality controls

Digital delivery

Use SVG for scalable marks and icons. Use transparent PNG where vectors are unsupported. Export in sRGB and inspect at the target viewing size.

Print delivery

Keep artwork vector where possible. For raster images, target 300 ppi at final size. Agree bleed, color profile and PDF settings with the printer; approve a physical proof.

Accessible documents

Keep text selectable. Verify reading order, document language, meaningful links and image alternatives in the final PDF workflow.

This PDF is optimized for screen review. A printer-specific press file and formal accessibility validation are separate production checks.

05 / BRAND IN PRACTICE

Make every detail feel like VSPH.

A shared responsibility

Assign a brand steward to maintain approved artwork, templates and guideline versions. Keep current files together and archive superseded editions.

Review new, high-visibility applications before release. Record the reason and date for any change to the system.

BEFORE YOU PUBLISH

The checklist applies to each final deliverable. Complete verification of reconstructed artwork before adopting the master asset library.

Correct logo version and proportions

Exact brand colors and suitable contrast

Clear, useful and accurate language

Appropriate imagery and usage rights

Clear space and readable minimum size

Consistent Inter typography and hierarchy

Verified claims and company details

Correct final dimensions and export settings
